

here's the secure way we shred documents:

1 All documents are transported in locked containers in a secure box truck

2 Documents are shredded to a 1/2" strip cut then baled. We now offer crosscut.

3 All bales are transported to a paper mill for recycling (within the United States)

4 All processes and security are ensured
We have earned AAA NAID Certification and ISO 9001.2008
(visit www.naidonline.com and www.NSF/ISO.com for more information)

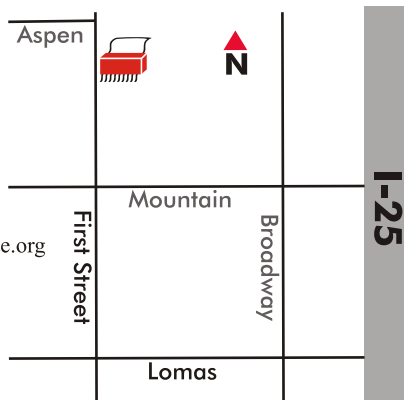

ready to shred?

If you need to shred paper, destroy computer hard drives, or recycle x-rays, come see us or arrange an ongoing service!
